THE LIBRARY OF CONGRESS
WASHINGTON : 1955

INTRODUCTORY NOTE

The MONTHLY LIST OF RUSSIAN ACCESSIONS is a record of the publications in the Russian language received and put out side the Soviet Union that are currently received by the Library of Congress and a group of cooperating libraries. Whenever possible, publications printed in other languages, produced in the Soviet Union are also included. However, publications in the languages of the U. S. S. R. and in countries of Eastern Europe are not included, since they are covered by the *East European Library List*.

The MONTHLY LIST consists of three parts. Part A lists monographic literature, but no non-fiction published earlier than 1945 are included. To facilitate the use of this LIST by readers who are not thoroughly familiar with the Russian language, the title in the original language in Part A is preceded by its English translation in brackets. Since this procedure changes the alphabetic arrangement of titles, cross-references are given from these titles to their English translation.

Part B lists the subjects dealt with in the titles of content translated into English. However, non-fiction published earlier than 1945 are not included.

Part C is a subject index to all the monograph and periodical articles listed in Parts A and B. Monographs are listed under the appropriate subject headings first, followed by the periodical articles. For the convenience of readers desiring to examine only monographs or periodical articles, the monographs are printed in a slightly heavier type than the periodical articles. The titles of monographs are given both in the original language and in English translation, whereas titles of periodical articles are given in English translation only. In citing periodical articles the following data are given: name of the month of the year.

Monthly List *of* Russian Accessions

Vol. 8, No. 8

November

THE LIBRARY OF CONGRESS
WASHINGTON ; 1955

INTRODUCTORY NOTE

The MONTHLY LIST OF RUSSIAN ACCESSIONS is a record of the publications in the Russian language issued in and outside the Soviet Union that are currently received by the Library of Congress and a group of cooperating libraries. Whenever possible, publications printed in other languages spoken in the Soviet Union are also included. However, publications in the languages of the U. S. S. R. issued in countries of Eastern Europe are not included, since they are covered by the *East European Accessions List*.

The MONTHLY LIST consists of three parts. Part A lists monographic literature, but no accessions published earlier than 1915 are included. To facilitate the use of this LIST by readers who are not thoroughly familiar with the Russian language, the title in the original language in Part A is preceded by its English translation in brackets. Since this procedure changes the alphabetic arrangement of title entries, cross references are given from these titles to their English translations.

Part B lists Russian periodicals with their tables of contents translated into English. However, accessions printed earlier than 1917 are not included.

Part C is a subject guide to both the monographs and periodical articles listed in Parts A and B. Monographs are listed under the appropriate subject headings first, followed by the periodical articles. For the convenience of readers desiring to examine only monographs or periodical articles, the monographs are printed in slightly heavier type than the periodical articles. The titles of monographs are given both in the original language and in English translation, whereas titles of periodical articles are given in English translation only. In citing periodical articles the following abbreviations are used for the months of the year:

| | | | | | |
|----|----------|----|--------|---|-----------|
| Ja | January | My | May | S | September |
| F | February | Je | June | O | October |
| Mr | March | Jl | July | N | November |
| Ap | April | Ag | August | D | December |

Sample title: Electric action of the brain in glaucoma. L.S.Levina, G.M.Noishtadt. Vestnik, 30 no. 8: 12 S. O. 51.

Explanation: An article with title given above in English translation, written by L. S. Levina and G. M. Noishtadt, will be found in the September-October 1951 issue of *Vestnik oftalmologii*, vol. 30, no. 8, pages 8-12.

A list of periodicals included in the current issue, with abbreviations used, is given at the beginning of Part C in each issue of the LIST. The number and letter in parentheses following each periodical title indicate the class and subclass in which it is to be found in Part B. Cumulative lists of periodicals included in the current volume appear in numbers 6 and 12 of that volume. These lists are arranged by subject; the symbols of American libraries other than the Library of Congress, known to have current files of such periodicals, follow each title.

Except in Part C, the material is divided into 17 sub-classes within each class. In addition, for the convenience of the reader, the material is further divided within each subject class into several sub-classes. The usual Library of Congress system except that cited, all listed items are represented in the collection. A symbol indicates when items are available in other libraries indicate when items are available in the Library of Congress.

A cumulative author, subject, and periodical list of the MONTHLY LIST is available as a separate public index to the monographs, and a periodical location appendix to the first two issues of the following volume.

Orders for microfilm or photostat copies of the Library of Congress may be placed with the Photoduplication Service, 1000 G. St., N. W., Washington 25, D. C.

The MONTHLY LIST OF RUSSIAN ACCESSIONS is published by the U. S. Government Printing Office, Wash-
